Devart dbForge Schema Compare for Oracle v2025.3.107 (12 Feb 2026)

2026-03-13 15:03:26

streamlines the comparison and synchronization of Oracle database schemas. This tool allows users to analyze the impact of changes made to their database schema, identify differences between Oracle databases, and generate customizable Oracle schema comparison scripts. With features such as generating SQL*Plus scripts, automating migration processes, and providing detailed reports, it significantly simplifies the schema management process. Integration with source control enhances schema versioning, ensuring a more controlled and efficient database development lifecycle.

Devart dbForge Schema Compare for Oracle offers a comprehensive solution for comparing and synchronizing Oracle database schemas. By effortlessly identifying discrepancies between databases, this tool facilitates seamless updates and modifications. Its ability to generate SQL*Plus scripts, automate migration processes, and provide detailed reports in multiple formats significantly simplifies the schema management process. With **Devart dbForge Schema Compare for Oracle**, users can confidently manage their Oracle database schemas, enabling efficient development, testing, and production deployments.

Key Features of **Devart dbForge Schema Compare for Oracle** :

1. Analyze the impact of changes to the database schema
2. Identify differences between Oracle databases
3. Generate customizable Oracle schema comparison scripts
4. Generate SQL*Plus scripts to update one schema with another
5. Apply updates from development databases to staging or production
6. Compare table structures in the same or different Oracle databases
7. Create schema snapshots for savepoints in database development
8. Automate migration of schema changes using the command-line interface
