Veeam Backup & Replication Enterprise Plus v13.0.1.180 for Win x64

2026-03-04 13:35:33

Veeam Backup & Replication Community Edition stands as essential backup software, safeguarding virtual, physical, and cloud workloads with its comprehensive capabilities.

This software facilitates the backup and restoration of virtual machines, offering the flexibility to recover entire virtual machines. is an efficient and cost-effective solution known for its user-friendly interface. It ensures fast, reliable, and flexible recovery of virtualized applications and data, consolidating virtual machine replication and backup into a unified solution. With optimal support for VMware vSphere and Microsoft Hyper-V virtual environments, **Veeam Backup & Replication**, a vital component of the Veeam Availability Suite, continues to evolve with innovative features introduced in new versions. It plays a crucial role in meeting service-level goals by enabling the rapid recovery of IT services, applications, and data, ensuring Availability for the Always-On Enterprise.

Key Features of **Veeam Backup & Replication Enterprise Plus**:

BACKUP:

1. Image-level VM backups: Create application-consistent backups with advanced application-aware processing.
2. Backup from Storage Snapshots: Utilize HPE, NetApp, EMC, NimbleNEW, and CiscoNEW for ultra-fast backups with low RPOs.
3. Scale-out Backup Repository: Establish a unified virtual pool of backup storage, allowing easy storage capacity extension.
4. Veeam Cloud Connect: Securely and rapidly transfer backups off-site without the complexity of maintaining an off-site infrastructure.
5. SureBackup: Automatically test and verify every backup and virtual machine (VM) for recoverability.
6. Built-in WAN acceleration: Expedite off-site backups by up to 50x and save bandwidth.
7. Direct Storage Access: Enhance vSphere backups with faster performance and reduced impact via Direct SAN and Direct NFS Access.

所有软件资源 100%安全 已检测 无病毒 无篡改

Tools Applications

RECOVERY:

1. Instant VM Recovery: Restore a failed VM in less than two minutes.
2. Instant File-Level Recovery: On-the-fly recovery of guest OS files and folders.
3. Veeam Explorer for Microsoft Active Directory: Instant recovery of individual AD objects, containers, user accounts, passwords, Group Policy Objects (GPOs), and Active Directory-integrated DNS records.
4. Veeam Explorer for Microsoft Exchange: Rapid recovery and detailed export reports for individual Exchange items, including hard-deleted items.
5. Veeam Explorer for Microsoft SharePoint: Easy recovery of specific SharePoint items and individual sites.
6. Veeam Explorer for Microsoft SQL Server: Quick transaction and table-level recovery of SQL databases for precise point-in-time restore.
7. Veeam Explorer for Oracle: Transaction-level recovery of Oracle databases, including agentless transaction log backups.
8. Veeam Explorer for Storage Snapshots: Recover single files and entire VMs from HPE, NetApp, EMC, and NimbleNEW storage snapshots.
9. Native tape support: Store entire VM backups or individual files on tape, with features like direct restore from tapeNEW for growing enterprise environments.
