

## Presonus Beauty And The East SOUNDSET

2025-02-10 17:00:57    [label](#)    [我要反馈](#)    [下载页面](#)

**Presonus Beauty And The East SOUNDSET:** Beauty, in addition to the East is all about connecting cultures that seem incompatible through music. The bionic beats from a vintage drum machine are supported by natural, really vintage far-east wooden drums. A classic Moog-like monophonic synth string harmonizes with the sitar, which is highly polyphonic. Beauty and the East is the sound you'd hear when you drop the whole city of Jaipur in the middle of Detroit or place the Higashiyama District on the north-facing side of the city center of Atlanta. Your feet will be enticed to dance; your mind will likely wander off into the far regions... And what about your hips? That's nothing to do with us.

Ten multi-track, key-labeled free, and royalty-free construction kits will help you get inspired, so cut up the kits and re-arrange the pieces into your cross-cultural pairings. Also included are 58 presets with Sample One and five one-shot kits for Impact XT to create unique beats and melodies from the starting point.

### How to use kits to integrate your works?

You can do it using "Presonus Beauty And The East SOUNDSET" in Sound Effects.

### Where can I download the product?

After subscription, You can download it for free from [here](#).

### What is Presonus Beauty And The East SOUNDSET?

a sound set or sample library created by PreSonus, designed to provide a unique musical experience by blending elements from different musical cultures and styles. Here's a summary of what this sounds set offers:

**Cultural Fusion:** "Beauty and the East" combines musical elements from different cultures, including vintage drum machine beats, traditional far-eastern wooden drums, classic Moog-like monophonic synth strings, and sitar sounds.

**Musical Diversity:** The sound set aims to connect seemingly incompatible musical cultures and create a fusion of sounds that is both unique and inspiring.

**Inspiration:** The sound set includes ten multi-track, key-labeled construction kits that are free and royalty-free. These kits are designed to inspire music producers and provide a starting point for creating cross-cultural music.
