

HTML Component Library v4.8 for Delphi 5-12 Athens

2024-12-18 23:02:30

HTML Component Library is a comprehensive and versatile solution for integrating HTML and CSS capabilities into Delphi and Lazarus applications, empowering developers to create feature-rich desktop and mobile experiences. Unlike other libraries, it boasts a robust rendering core with extensive HTML 4.1 and CSS 3 standards support, delivering advanced features such as tables, shadows, animations, and SVG images. With a focus on native Delphi code, the library eliminates dependencies on external DLLs or ActiveX components, ensuring seamless integration and reliable performance across platforms.

Developers benefit from many core functionalities, including HTML and CSS parsing, DOM manipulation with jQuery support, SVG rendering, and native HTTP client implementations for Windows and OSX. Additionally, the **HTML Component Library** provides rendering canvases and HTML-enabled VCL controls, offering flexibility and ease of use in creating visually appealing interfaces. Its cross-platform scripting engine enhances versatility, enabling developers to implement complex functionality easily.

Furthermore, the excels in format conversion tasks, enabling seamless transitions between HTML, PDF, plain text, images, and SVG formats. With optimized performance and fast parsing speeds, developers can achieve smooth rendering and layout calculations, ensuring a high-quality user experience. Whether working on desktop or mobile applications, the **HTML Component Library** provides the tools and capabilities to create compelling and feature-rich applications across various platforms.

Key Features of HTML Component Library :

1. Powerful HTML/CSS rendering core with full support for HTML 4.1 and CSS 3 standards
2. No dependencies on DLLs, ActiveX, or third-party libraries, offering pure native Delphi code
3. Utilized by developers worldwide, including within the Delphi IDE itself
4. Supports all Delphi versions from Delphi 7 to Delphi 12 Athens, including FMX platforms for Win32/64, OSX, Android, iOS, and Linux
5. Core functionality includes HTML and XML parsing, CSS parsing, DOM manipulation with jQuery support, SVG rendering, and native HTTP client implementations for Windows and OSX.
6. Provides rendering canvases and HTML-enabled VCL controls for creating visually appealing interfaces
7. Cross-platform scripting engine enhances versatility and enables implementation of complex functionality.
8. Facilitates seamless format conversions, including HTML to PDF, plain text, images (JPEG, PNG, etc.), SVG, and conversions from RTF and MS Word. DOCX formats
9. Optimized performance with efficient parsing speeds, ensuring smooth rendering and layout calculations
10. Ideal for creating feature-rich desktop and mobile applications with advanced HTML and CSS capabilities
