FUTURISTIC SOUND DESIGN ELEMENTS

Occasionally a noise is essential to get an intricate sound design and at times one noise is an iconic announcement. NEON is equally: A contemporary SFX library that's essential to designing new sounds while enlarging your library together with unprecedented stand SFX.

WHAT'S INSIDE

INCLUDED SOUNDS - KEYWORDS

BLASTS, BRAHMS, HITS, MOVEMENTS, PARTICLES, WHOOSHES, TEXTURES, ZAPS, AMBIENCES

Ideal for STANDALONE USAGE

NEON has been built to deliver yet understated creative sound design and sonic quality. Each sound was and needed to pass the exact critical ears of each sound designer that is involved. This procedure took us more than normal, but the outcome speaks for itself. Over 700 professional audio effects are awaiting for you to shed some limbs.

PERFECT TO DESIGN YOUR OWN ASSETS

NEON includes pre-processed and designed supply material that's helpful for audio designers to produce their own resources. Our routine BOOM Library DESIGNED ranges are processed and assessed for excellent instant results in your endeavors, whereas our routine CONSTRUCTION KITS include our dried and raw source records. NEON matches the gap between. The noises are somewhat less processed, leaving sufficient space to additional mangle, procedure, and improve them to incorporate your individual spin to it, making NEON an ideal toolset for efficient and fast contemporary audio design.

PERFECT FOR TRAILERS

NEON is your greatest weapon for contemporary and contemporary trailer audio style. Adding these enormous blasts, creative strikes, and grasping motion seem and whooshes for your job, will make them seem cutting edge, whether you want it or not.

WHAT WE RECORDED

The recording section for NEON was quite challenging. A huge part was clearly to get stuck into all sorts of synthesis and make supply material for our audio creation in the future. We utilized both hardware and software synths and invested a great deal of time on our semi-automatic synth to make cutting edge sounds. Additionally, we spent a great deal of time documenting organic material like metal scratches, drum effects, make-shift tools, etc. to have the ability to put that by means of a routine and processing string again. In that manner, we struck an excellent balance between artificial and organic material.

WHAT'S SO SPECIAL ABOUT THIS LIBRARY?

NEON stands out to us since it is located somewhere between the typical Structure Kit and Engineered approach. It surely has structure kit personality, on the 1 hand, it may be utilized to liven your sounds and also to supply additional and distinct personality to present sound creations, together with sufficient dynamics left to process it into individual requirements. On the other hand, NEON seems to hold-up incredibly well on its own, including exceptional electricity and sci-fi personality to your visuals straight from the box.
