WICKEDLY FAST + ACCURATE GRADES

FOCUS ON WHAT COLORS, NOT HOW TO GET THERE WITH COLOUR MAP X

Quickly employ exact color mapping out of any picture, right On your photograph. ColourMap X enables consumers to sample color swatches and color Ranges from almost everywhere, and immediately use these gradient maps into your Picture to offer the specific color quality your customer requirements. A Complete instrument To match collections of pictures from other locations.

COLOUR MAP X | COLOR GRADING PLUGIN

ColorMap X™ Permits You to sample a color out of ANY Picture of ANY theme and use it in a photograph. Together with the click of a button, you're able to create a gradient map in the picture of your own choice, change this, and Apply or perhaps save it for future usage. When It's a snapshot in the Cell Phone Or film screenshot, you are able to extract the ideal palette and use it in your photograph.

- Machine Learning established an algorithm
- Pick Upward 10 color swatch samples to infusion
- Alter (or shuffle) expressed colors mechanically
- Export And import custom color palettes
- Employ As many gradient channels as you want
- Gradient Map alteration layers could be further categorized as normal in Photoshop.
- Manually Alter any particular color swatch to customize your extracted palette.

COLOUR MAP X IN ACTION

Perfect color score, together with pace and precision, is currently In reach. ColorMap X™ requires the guesswork from grading, also places the Electricity --and time--again on your own hands. You can personalize palettes, change any of The colors to suit your picture, shield your shadows and highlights, and Even pile multiple gradient channels for boundless looks. Speed, precision, and Ultimate controller in color grading in a single Plugin.

SMART WORKFLOW FOR CREATIVES

ColorMap X™ actually excels when color scoring sets of pictures. As anybody who shoots or retouches editorials understands, it can be incredibly catchy To make a fitting color tier across 10 pictures. However, together with ColorMap X™you can Employ a tier to a picture, export and save, then utilize exactly the exact same grade for each shot. And if you can find any inconsistencies, then you can correct them by creating rapid Adjustments to a couple of sliders in Photoshop.

THE WORKFLOW SUIT
