Mailer v1.6 (30 Sep 2024) Nulled - Email Marketing Application

2026-08-26 15:27:43

Mailer is an all-in-one email marketing platform that simplifies newsletter campaigns and improves audience engagement. A Laravel 8.1 app built with Vue.js and MySQL, **Mailer** is simple to set up and doesn't require monthly subscription fees. And because you don't pay until you have to pay subscribers who receive an email each week, you can focus on creating a compelling newsletter without any ongoing costs or headaches.

Whether working with classic automation or targeting a certain group of recipients, Mailer gives you a flexible toolkit for your needs. You'll have everything from dynamic list segments to detailed reporting all in one place to create professional, data-driven email campaigns. You also get free updates, which are new every year, for less than the cost of a good cup of coffee.

You own your data with . You can use it to keep the visibility of your campaign performance most easily, grow your audience, and optimize engagement. No more restrictive email marketing subscription plans and the ability to finally control your email marketing strategy.

Key Features of **Mailer** :

1. **Dashboard:** Get real-time insights into campaign performance and subscriber activity.
2. **Campaign Management:** Create and schedule newsletters with flexible settings for optimal reach.
3. **Email Overview:** Track every email's performance at a glance to refine your strategy.
4. **Lists & Segments:** Organize and target your audience with advanced segmentation options.
5. **Subscriber Import:** Quickly migrate existing subscribers and start sending right away.
6. **Template Builder:** Craft responsive email templates with an easy, user-friendly interface.
7. **Users & Roles:** Control access for different team members with customizable permissions.
8. **Custom Fields:** Collect additional subscriber data to personalize your marketing efforts.
