Devart dotConnect for Adobe Commerce Professional v3.0.0 (18 Dec 2025)

2026-01-12 12:00:21

is a robust ADO.NET provider tailored for seamless integration of Magento data into .NET applications. With its comprehensive suite of standard ADO.NET classes like MagentoConnection and MagentoDataAdapter, developers can swiftly engage with Magento data without delving into intricate Magento-specific nuances. This streamlined approach empowers users to effortlessly harness Magento services within their data-oriented projects.

Simplifying the development process, **Devart dotConnect for Adobe Commerce Professional** facilitates the rapid creation of .NET applications in C# or VB, offering a familiar ADO.NET interface. Its intuitive design-time editors and tight Visual Studio integration further streamline the workflow, reducing coding overhead. By enabling direct access to Magento data from Visual Studio's Server Explorer, developers can efficiently query and manipulate Magento entities without navigating complex APIs.

Moreover, **Devart dotConnect for Adobe Commerce Professional** empowers developers with the power of SQL, allowing seamless execution of CRUD operations and complex queries against Magento entities. Leveraging SQL's flexibility, developers can harness familiar constructs like JOINs and WHERE conditions, amplifying productivity. Additionally, with Entity Framework support spanning versions 4 to Core 7.0, developers can leverage advanced features like LINQ to Entities and entity relations, further enhancing the efficiency of Magento data integration within their .NET applications.

Key Features of **Devart dotConnect for Adobe Commerce Professional** :

1. Seamless integration of Magento data into .NET applications

所有软件资源 100%安全 已检测 无病毒 无篡改
