### TrakTrain Open Mind Lo Fi Sample Pack vol. 2:

Traktrain proudly presents the second installment of the "Open Mind" Lo-Fi Sample Pack, featuring a curated selection of 300 top-tier samples crafted by one of our affiliated producers. This collection offers an array of instrument loops, encompassing drums, bass, synths, and an assortment of effects samples. Furthermore, all these sounds are also available as one-shot samples. While originally designed with a focus on Boombap and Lo-Fi genres, these versatile sounds will effortlessly find their place within any Hip-Hop style.

Building upon the foundation of the first volume, this kit pushes the boundaries of creativity and innovation. It shines with impeccably crafted drum grooves, paying homage to retro drum machines while retaining a contemporary and fresh vibe. Each drum loop is conveniently split into two files, providing enhanced flexibility for your compositions.

Notably, this kit places a significant emphasis on its melodic content. For instance, the lush chord loops create a captivating wall of sound, enriched with intricate harmonies, and performed using ethereal and evolving synthesizers. Additionally, the melodic stacks offer multipart arrangements that gracefully occupy the higher-frequency spectrum. To top it off, the author has thoughtfully included song-starter elements perfect for crafting attention-grabbing intros.
