This package includes 4 presets that I use in my day-to-day work and for client assignments. These presets were developed over 4 years as a photographer specializing in travel and adventure lifestyle photography. I have been constantly tweaking them during editing ten thousand images to improve my workflow.

These presets will give your images a unique, clean look that you can easily adapt to match your photos. You can change the blacks, fade, or saturation with just one click.

This pack includes a video explaining how to use the presets, and what you should be paying attention to. These are some of the best edits I have made to my images.

Gfx plugin details of Daniel Ernst Presets + Video Guide

The product is in the **Lightroom category**, for more information about this post you can click on the home page link in the sidebar.
