

Meg Bitton — Newborn Studio: Family Posing

2025-02-10 17:03:12 [label](#) [我要反馈](#) [下载页面](#)

Meg Bitton — Newborn Studio: Family Posing: Discover the secrets to capturing stunning images of newborns alongside their entire family unit. While the newborn takes centre stage during the session, including parents and siblings as integral parts of the narrative is essential. In this workshop, our newborn specialist, Niki Torres, will guide you through the process of creating remarkable family portraits using our signature One Light Studio Setup.

With our simple yet effective tools, you'll learn how to seamlessly incorporate the whole family into your newborn sessions, amplifying both your images' creative possibilities and emotional resonance. Create timeless memories that families will cherish for generations, all while increasing your sales and profitability.

Join Niki and me as we present Simple Studio Extended Newborn, where we expand the scope of traditional newborn sessions to encompass the entire family. With two separate family sessions captured in this series, you'll gain invaluable insights and techniques to elevate your photography to new heights.
