

TMS VCL Grid Excel Bridge v3.4.0.0 for Delphi XE-13 Florence Full Source

2026-09-27 21:53:48

TMS VCL Grid Excel Bridge is a pivotal connector between TMS VCL Grid and Microsoft Excel, offering a streamlined data exchange and synchronization solution between these two powerful components. This bridge facilitates a seamless and efficient data flow, empowering developers to harness the strengths of TMS VCL Grid and Excel collaboratively. With this integration, users can effortlessly import and export data, perform complex calculations, and present their findings with the rich visualization capabilities of the TMS VCL Grid, creating a cohesive and productive development experience.

At the core of **TMS VCL Grid Excel Bridge** is its ability to synchronize data bidirectionally between TMS VCL Grid and Excel worksheets. Developers can quickly transfer data between the grid and Excel, maintaining consistency and accuracy. This synchronization simplifies data manipulation and ensures that changes made in one environment are reflected in the other, providing a real-time, dynamic connection between TMS VCL Grid and Excel.

The bridge extends beyond mere data exchange, offering advanced features such as support for Excel formulas and functions within the TMS VCL Grid. This empowers developers to directly leverage Excel's powerful computational capabilities within their VCL applications. TMS VCL Grid Excel Bridge also provides a user-friendly interface for configuring the integration, making it accessible for developers of varying expertise levels.

In conclusion, the is valuable for developers seeking to enhance their applications with the collaborative strengths of TMS VCL Grid and Microsoft Excel. By seamlessly connecting these two components, the bridge opens up a realm of possibilities for efficient data management, computational analysis, and visually compelling presentations, all within the familiar environment of TMS VCL applications.

Key Features of TMS VCL Grid Excel Bridge:

1. The different TMS VCL UI Pack and TMS Flexcel grids interface provide import/export capabilities. XLS & .XLSX, PDF formats
2. The fully native solution to import/export to .XLS, XLSX without the need for Excel to be installed
3. Fully native solution to export grids to .PDF
4. Import/export a wide range of cell properties
5. Import/export of cell images, multi-cell images, checkboxes
