2026-07-15 11:35:35

is an all-in-one tool that makes managing your files between your PC, cloud storage, and FTP servers a breeze. Whether you need to transfer, upload, or organize your files, **FTPie Pro** provides a simple and user-friendly interface. It integrates with Google Docs and Microsoft 365 apps, allowing you to edit documents, spreadsheets, and presentations directly from the app, saving time and hassle.

This app also offers powerful sharing and upload features. With just a right-click, you can instantly upload files or folders to your cloud storage or FTP and generate shareable links. Folder shortcuts allow you to quickly access cloud and FTP folders from your desktop without opening the app, streamlining your workflow.

Additionally, **FTPie Pro** is perfect for streaming media from the cloud. You can play videos and music directly from your cloud storage without downloading them, ensuring smooth, high-quality playback. It also supports various file types, so you can view and edit documents, images, PDFs, and more all in one place.

Key Features of FTPie Pro :

1. Built-in Viewers and Editors: Edit and manage files without switching apps, all within FTPie Pro.
2. Quick Share: Easily share files by generating URLs right from your desktop with a right-click.
3. Quick Upload: Instantly upload files to cloud storage or FTP with the same right-click convenience.
4. Document Editing: Seamless integration with Google Docs and Microsoft 365 lets you edit files directly from the app.
5. Folder Shortcuts: Create desktop shortcuts for cloud and FTP folders, enabling one-click access.
6. Stream Media from Cloud: Play videos and music directly from your cloud storage without downloading.
7. Multi-Format Support: View and edit documents, spreadsheets, images, PDFs, and more, all within the app.
