Cascadeur:

Cascadeur is a software that can be used standalone that allows 3D keyframe animation of humanoids and other types of characters. Never before, creating animated animations from scratch and editing an existing one was so simple and enjoyable. With the help of AI-assisted tools, you can create crucial poses extremely quickly immediately see the physical outcome and alter secondary motion. You can also control the entire process at any moment.

How does the AutoPhysics Tool allow you to create natural and realistic motion?

You can create a natural movement using "Cascadeur".

Where can I download the product?

After subscription, You can download it for free from here.

EASY TO RIG

Drag-and-drop joints for your character using the Quick Rigging Tool to create the rig on autopilot. Rig standard skeletons of Daz3d, Character Creator, Mixamo, Unreal Engine, Metahuman, or Player. me in just a single click. You can modify the auto-generated rig, or design your own characters.

EASY TO POSE WITH AI

Our unique intelligent rig, powered by neural networks lets you create poses faster and more efficiently. Simply move the main point of control and it will then position the rest of your body automatically. You can change any point and still have complete control over the outcome.

EASY TO PHYSICS

AutoPhysics Tool allows you to create a natural and realistic motion, and alter the animation to the minimum extent possible. The suggested animation will be displayed on a green representation that represents your persona. It is easy to apply it to your character after you are pleased with the outcome.

ADD LIFE WITH SECONDARY MOTION

You can easily add any additional motion using our dedicated tool. You can customize the effect at any time for any body part separately. Shake, bounce, and overlap to bring your animation to life.

ENJOY A FULL RANGE OF ANIMATION TOOLS

Cascadeur has a variety of animation software e.g. Ghosts, Trajectories Copy Tool, Tween Machine, IK/FK Interpolation, Graph Editor, Video Reference Import Cameras, and other tools! We're working to make all of our tools user-friendly and continually adding new features to the program.

Learn by using Cascadeur

We've put together a series of online tutorials that will get you familiar with 3D animation methods in Cascadeur

What is Cascadeur?

Cascadeur is a specialized computer software application designed for character animation and physics simulation in the field of 3D animation and visual effects (VFX). It's primarily used by animators and VFX artists to create realistic and

physically accurate character movements in digital animation projects, such as films, video games, and simulations.

Cascadeur is particularly beneficial for animators who want to achieve highly dynamic and physically accurate animations, such as combat scenes, sports sequences, or character interactions with complex environments. Its physics-based approach helps animators save time and effort while achieving realistic and compelling results.
