

Afterlogic Webmail Pro PHP v9.7.0 (20 Mar 2023) + License Key

2024-12-18 23:03:30 label 我要反馈 下载页面

AfterLogic WebMail Pro PHP delivers a webmail front-end to your current email server, with a private calendar, contacts, and cellular sync. Fully-featured yet glossy, WebMail Pro provides all of the features users expect. Available for Windows and Linux servers. Constructed on the latest HTML5 and CSS3 technology. WebMail Pro ASP.NET and WebMail Pro PHP versions fulfill your present users' requirements with a quick and modern-looking webmail user interface offered in several different languages.

Commercial-grade care: Committed developers group adds new features and improvements regularly.

Safe: Can operate to a secure HTTPS server and communicate with a mail server over an SSL connection.

International: Over 30 languages, right-to-left interface service (such as Hebrew and Arabic), time and date formats.

Has Private Calendar: Supports single and recurring events with reminders, may behave as CalDAV server for syncing with outside programs and mobile devices.

Documents: Implements Cloud storage of documents and folders with DAV sync.

Professional assistance: AfterLogic helps you quickly resolve issues and keep things current, offering guaranteed answers and instantaneous bug fixes to your reassurance.

Plugin framework and API for easy integration: A pair of programmer tools allows you to expand the program in many ways, such as user interface alterations, Single-Sign-On, and much more.

Mobile sync for Mail, Contacts, and Calendar: Enable your customers to keep their data in sync using IMAP, CardDAV along with CalDAV support. iPhone and iPad may get sync configurations.

Mobile variant: It is another choice to utilize email on smartphones. Optimized for smaller displays and touch input signal.

OpenPGP: Encrypt, sign, decrypt, and verify e-mails directly in the browser. Each of the crypto occurs right in the browserPGP keys decrypted information is routed to the host.
