

Abacre Advanced Log Analyzer v2.1.1

2025-01-06 23:31:39

Advanced Log Analyzer is basically described to be a very powerful web activity analysis software available for the users and developers. It has the capability to create a very high number of traditional report just like the most common pages as well as the references for the users and the most important benefit of this analyzer is basically the untraditional report just like the frequent visitor path as well as the profiles, the internet model report as well as the indirect and direct referrer evaluation reports that are available. The log analyzer has the capability to operate on the Windows 95, 98, NT, 200, XP, Vista, Windows 7, just as a:

- Window program along with a graphical user interface
- Console edition of the program available for the users.
- The program of the CGI that can work on the Windows server just like the Microsoft Internet information server as well as the Apache for the users and developers.

The web task analysis software can produce a high number of traditional reports for the user just like the most shared pages as well as the referrers. This potent website traffic analyzer software has the capability to produce a massive number of traditional report just like the visitor website, the most popular engines for the search, just like the paths as well as patterns. It has a lot of untraditional statistics just like the visitor pattern. It should be noted that it has the capability to support the Apache as well as the lock format of IIS 42 users and developers.

Abacre Advanced Log Analyzer Great Features:

It has the following features and characteristics that are stated as below such as:

- It has the capability to work as a console, GUI, as well as the program of CGI.
- The incremental investigation process is available and it does not analyze the same date twice for the user.
- There is a tremendous number of traditional reports available just like the most common pages as well as the referrers.
- It is considered to be incredibly fast and it does not expect a good deal of money in order to function for the user.
- There is a traffic collection of the untraditional reports.
- It has the capability to support the compressed document of the GZ log for its users and developers.
- It is considered to be having entirely configurable reports.
