Soundtrack Loops Vocal Magic Chops and FX: Soundtrack Loops introductions Vocal Magic Chops & FX. Vocal Magic Chops & FX is an EDM and Trap music library that covers various expressive vocal effects.

Let's explore its three large folders. The first folder is House & EDM. House & EDM folder contains the vocal chops loops of 87 with various vocal samples that transformed into arpeggios and rhythms chord structures vocoded along with stuttering effects, among many other highly refined and produced patterns and shapes.

The next one is the Song Kit folder--a self-contained standalone construction kit with stratified beats, various bass choices, and synthesizer parts. This is the perfect method to get this package to shine by creating an unfinished track straight from the beginning. The Trap & Drill folder is pure esoteric vocal FX, containing 66 loops with a vast selection of ear candy, and it even has risers.

If you're struggling to find the proper synth, you can try downloading the sample of Vocal Magic Chops & FX to see if you can find what you're looking for and more.

They are a part of the same soundscapes and are easily incorporated directly into the track's structure backbone. They are crisp and precise, have plenty of energy, and sound natural, lively, and very natural despite extreme processing.

In the continuum of man-machine, those 176 loops and sample tracks on Vocal Magic Chops & FX have found an intriguing point. They also are packed with a decent quality of entertainment too. They are also great as a Future Bass, Drum n Bass, Hip Hop, Pop, and almost every genre of music. Includes vocals by Seids and many more from Soundtrack Loops. Soundtrack Loops vocal team.

As is the norm for all loops made by The Soundtrack Loops team, the Key and BPM are recorded in metadata and the file's name.

- 176 Loops
- Various BPM
- Various Keys
- 24 bit 48kHz Stereo Files
