Axolot AXWWriter v1.03.10 for D7 & D10.1-D10.3 Rio Full Source

2024-12-18 23:02:15

AXWWriter is described be a word processing element which is basically designed to be compatible with MS word for the users and developers. The part does not need any other libraries or even software to be set up by the user and developer on the system. AXWWriter has the ability to work collectively with the DOCX Read Write which is also contained in its own form and it permits to user and developer in order to peek the DOCXReadWrite for the attributes that are additional. It should be noted that AXWWriter is not difficult at all and the user can use it easily if the user is knowledgeable about the DOCXReadWrite and user has the ability to manage the word information which is available through the DOCXReadWrite. AXWWriter usually comes with element for the process of printing as well as printing preview and it is a set of tasks which is contained for a simple assigning to the menus for the user. Regarding the downloading of the page the user has the ability to download the presentation program with the help of AXWWriter which is which is very possible in order to examine the user Word document. Along with the Delphi the AXWWriter has the ability to work with the version starting from 7 up to the present. The VCL as well as the fire monkey are encouraged in this case and there are no runtime chargers for the users. Last but not least there is a complete source code which is included for the users.
