Devart dotConnect for QuickBooks Professional v3.0.0 (18 Dec 2025)

2026-01-12 11:46:16

simplifies QuickBooks Online integration in .NET apps, offering ADO.NET support with ORM capabilities. Its intuitive design-time editors and Visual Studio integration streamline development, reducing coding efforts. Developers can bind QuickBooks Online data easily, perform CRUD operations with SQL statements, and accelerate time-to-market.

Moreover, **Devart dotConnect for QuickBooks Professional** extends support to Entity Framework, spanning versions 4 through Core 7.0. With features like LINQ to Entities and entity relations, developers can efficiently manage QuickBooks Online data within their applications. Combined with Visual Studio integration and Entity Developer support, dotConnect for QuickBooks Professional empowers developers to build robust .NET apps with seamless QuickBooks Online integration.

Key Features of **Devart dotConnect for QuickBooks Professional** :

1. ADO.NET support with ORM capabilities
2. Intuitive design-time editors
3. Visual Studio integration
4. Quick integration of QuickBooks Online data
5. Simplified CRUD operations with SQL statements
6. Accelerated development process
7. Entity Framework support (versions 4 through Core 7.0)
8. LINQ to Entities compatibility
9. Efficient entity management
