Devart dbForge Data Generator for Oracle v2.5.203 (19 Feb 2024)

2025-01-15 23:42:57

is a powerful GUI tool crafted to seamlessly generate meaningful test data for Oracle schemas. Its intuitive interface and extensive library of over 200 predefined and customizable data generators enable users to populate Oracle databases with realistic data efficiently. By offering support for essential column data types and flexible customization options, such as data uniqueness and country-specific data, the tool empowers users to tailor data generation to their specific needs.

One of the standout features of **Devart dbForge Data Generator for Oracle** is its comprehensive support for data integrity, including foreign keys and SQL CHECK constraints. This ensures the accuracy and consistency of generated data across multiple tables, enhancing overall data quality. Moreover, users can customize data population scripts and leverage various data population options, such as opening scripts in an internal editor or running them against databases to suit their workflow preferences.

Additionally, the tool offers advanced functionality such as basic generators, meaningful generators for realistic test data, user-defined generators for customization, and a command-line interface for automating tasks. These features streamline the data generation process, saving users time and effort while improving testing efficiency and reliability. Overall, **Devart dbForge Data Generator for Oracle** provides a comprehensive solution for generating meaningful test data, making it an essential tool for Oracle developers and testers.

Key Features of **Devart dbForge Data Generator for Oracle** :

1. Extensive library of over 200 predefined and customizable data generators
2. Support for essential column data types, including VARCHAR2, DATE, and BLOB
3. Flexible customization options such as data uniqueness and country-specific data
4. Comprehensive support for data integrity, including foreign keys and SQL CHECK constraints

所有软件资源 100%安全 已检测 无病毒 无篡改
