Double Light Photoshop Effect:

Struggling with the Puzzle of how to earn a glow effect in Photoshop? It is not a major deal to tame the neon colors and cause them to smoothly to your own beat: everything you need is just one well-made PSD record from this Dual Lighting Photoshop Impact, made with Pixelbuddha Team.

The Entire job Procedure Won't require much time since it moves through these measures. You simply replace the photograph with the images of your own and select among those 3 color schemes I prepared beforehand by mixing color compatibility. Certainly, there is a choice to adjust colors yourself, therefore give it a try also.

The result will not resemble The poorly-made pictures with distortion: you've got all of your first graphics Properties untouched but improved with the ability of dual shine. Make Futuristic shots, enigmatic promos, covers, creepy images, or fashionable invitations!

The Product comprises:

- High-quality PSD record;
- 3 Fragrant color schemes;
- 4500 x 3000 px;
- Help document.
