IT Hit WebDAV Server Engine for .NET v15.4.16086 (30 Dec 2025)

2026-03-04 13:55:38

makes adding WebDAV functionality to your .NET projects easy. Whether you're building a standalone WebDAV server or integrating WebDAV capabilities into your CMS, DMS, or CRM, this engine takes care of your hard work. You don't need to be an expert in WebDAV protocols or XML—everything is handled through an intuitive .NET API, so you can focus on your application's features instead of complex standards.

The engine works seamlessly with a variety of storage solutions. Whether your data is stored on a file system, SQL database, Amazon S3, Azure, or a custom CMS/DMS, this tool can handle it. You can even define your folder structure to fit your application's needs. It's also extensively tested to ensure compatibility with most WebDAV clients, including tools like Microsoft Office, macOS Finder, and popular Linux applications, so users across different platforms can easily connect.

If you're working with Azure, the WebDAV Wizard simplifies server deployment. **IT Hit WebDAV Server Engine for .NET** creates a WebDAV server with Azure Data Lake storage, integrates with Azure Active Directory for secure authentication, and sets up everything within your Azure account. With this feature, you can deploy your WebDAV solution in minutes without the hassle of manual configurations.

Key Features of **IT Hit WebDAV Server Engine for .NET** :

1. **No WebDAV Expertise Needed** - Converts WebDAV requests into simple .NET API calls for easy integration.
2. **Supports Any Storage** - Compatible with file systems, databases, Amazon S3, Azure, and custom CMS/DMS solutions
3. **Wide Client Compatibility** - Works seamlessly with popular WebDAV clients across Windows, macOS, Linux, and mobile.
4. **Azure Integration** - Deploy a WebDAV server with Azure Data Lake and Azure Active Directory in minutes.

所有软件资源 100%安全 已检测 无病毒 无篡改
