

LMD VCL Complete v2025.0 for Delphi 12 Athens

2025-08-21 22:28:10

is a comprehensive development suite that offers a vast collection of tools and components for building robust applications using Delphi or C++ Builder. It includes all LMD Innovative VCL main products like LMD-Tools, EIPack, IDE-Tools, and NG Complete. Whether you need advanced UI controls, extended VCL features, or ready-to-use components for common tasks, **LMD VCL Complete** covers it all. Each purchase comes with a 1-year subscription that gives access to new releases, updates, and major versions within that period.

One of the standout features of **LMD VCL Complete** is the inclusion of full source code for all components, allowing for maximum flexibility and customization. Users can also access a GIT repository for daily builds and use LMD DevUtil to compile and create custom package combinations easily. The suite offers excellent support for modern development needs, including high DPI support, multi-monitor setups, and integration with the latest versions of Delphi and C++ Builder.

LMD VCL Complete is updated regularly with new features. Recent updates include enhanced installers, better HTML controls, improved print and memo components, and full support for the latest Delphi releases. Developers also benefit from extensive demo projects, free technical support, and access to prior versions upon request, ensuring they can work with whatever tools or versions their projects require.

Key Features of LMD VCL Complete :

1. 750+ native components: Extensive set of components to handle almost any development task.
2. Full source code: Included for all components, offering complete flexibility and customization options.
3. LMD DevUtil: A tool for automatic package creation and installation from source code.
4. Access to GIT repository: Provides the latest updates and daily builds for rapid development.
5. High DPI and multi-monitor support: Ensures seamless UI scaling across different screen sizes and resolutions.
