#### C.A. Sound Inc Car Destruction (WAV):

I acquired a junkyard car and decided to have some fun by completely wrecking it. I went all out, smashing the windows, doors, lights, and dashboard, resulting in a satisfying tearing of safety glass. Perhaps it should have ended up in a gory mess, a perfect blend of sweetness and grossness. The glass shatter explosions were particularly impressive.

Using a sledgehammer, I made sure to inflict some serious damage to the engine, accompanied by the impactful sounds of metal hitting and dragging over engine parts. One of the most satisfying moments was grinding and tearing the windshield. The safety glass, coated with a thin film of plastic, produced an amazing sharp crackling sound, reminiscent of peeling flesh. These recordings are perfect for adding detailed destruction effects to any project.
