

Winsoft Image Labeling ML for Android v1.0 for Delphi & CB 12 Athens Full Source

2024-12-18 23:02:45

is a Delphi library that integrates seamlessly with Android applications, allowing developers to label objects recognized in images. Leveraging Google ML Kit, this library supports over 400 different labels using the default model provided. Specifically tailored for Delphi 12, the library includes source code in the registered version, enabling developers to customize and extend its functionalities. With a royalty-free distribution model for applications, developers can deploy their creations without worrying about additional costs or licensing restrictions.

Key Features of Winsoft Image Labeling ML for Android:

- 1. Seamlessly label objects recognized in images within Android applications
- 2. Utilizes Google ML Kit for robust object recognition capabilities
- 3. Supports over 400 different labels using the default model provided
- 4. Compatible with Delphi 12 for easy integration into development workflows
- 5. Includes complete source code in the registered version for customization and extension
- 6. Allows for royalty-free distribution in applications, ensuring cost-effectiveness
