Devart dotConnect for Zoho Books Professional v2.0.0 (18 Dec 2025)

2026-01-12 12:04:21

is a versatile ADO.NET provider designed to integrate Zoho Books data seamlessly into your .NET applications. It uses familiar ADO.NET classes like ZohoConnection and ZohoCommand, allowing you to start working with Zoho Books data without learning new methods. This tool offers high performance, robust security features, and compatibility with a wide range of .NET platforms, making it a valuable asset for developers.

Connecting to Zoho Books through Visual Studio is simple and efficient. By selecting Zoho Books as your data source and completing the authorization process, you can quickly start working with your data directly within Visual Studio. This integration eliminates much of the manual coding effort thanks to powerful design-time editors that streamline your development workflow.

A key feature of **Devart dotConnect for Zoho Books** is its ability to execute SQL queries on Zoho Books data. You can perform all standard SQL operations like SELECT, INSERT, UPDATE, and DELETE without dealing with the complexities of the Zoho Books API. This allows you to manage your data using familiar SQL statements, including complex operations like JOINs and WHERE conditions, enhancing your data handling capabilities.

Key Features of **Devart dotConnect for Zoho Books Professional**:

1. **Direct Access to Zoho Books Data:** Work with Zoho Books data directly using familiar ADO.NET interfaces.
2. **High Performance:** Optimized for quick and efficient data operations.
3. **Comprehensive Security Features:** Ensures secure data transactions.
4. **Broad Compatibility:** Supports modern .NET platforms (e.g., .NET 5, 6, 7, 8) and older versions (e.g., .NET Framework 4.5 - 4.8, .NET Core 2. x and 3.0).
5. **Visual Studio Integration:** Easy setup and data management within Visual Studio, reducing manual coding.
6. **SQL Query Support:** Execute standard SQL queries (SELECT, INSERT, UPDATE, DELETE) on Zoho Books data.
7. **Entity Framework Support:** Use LINQ to Entities, manage entity relations with lazy/eager loading, and more with Entity Framework versions 4, 5, 6, and Core 7.0.
8. **Design-Time Editors:** Powerful tools to configure data components and easily bind controls to Zoho Books data.
