SautinSoft Document .Net v2024.3.3 (04 Mar 2024)

2025-04-13 09:29:19

SautinSoft Document .Net is a powerful .NET assembly that allows you to work with various document formats like PDF, DOCX, DOC, RTF, HTML, and Text without needing Microsoft Word. It's designed to be user-friendly and works across multiple platforms, including Windows, macOS, and Linux. This flexibility also extends to cloud deployment on services like Azure and AWS, making it a versatile tool for developers.

offers a wide range of features, enabling users to create, load, modify, merge, digitally sign, and convert documents. It also supports advanced functionalities like mail merge, report generation from templates and JSON, and rasterizing documents into images. The tool is completely standalone, eliminating the need for Microsoft Office or Adobe Acrobat, and supports multiple languages, including Latin, Chinese, Japanese, and more. Its unified Document Object Model (DOM) simplifies working with various document elements, ensuring a consistent experience across different formats.

Key Features of **SautinSoft Document .Net** :

1. Create and modify documents programmatically
2. Merge and split documents across different formats
3. Digitally sign PDF documents
4. Convert documents between formats like PDF, DOCX, RTF, HTML, and Text
5. Rasterize document pages into images (PNG, JPEG, TIFF, GIF)
6. Perform mail merge and generate reports
