- COMPATIBLE WITH THE DESKTOP VERSION OF PHOTOSHOP

What are Skintexture Photoshop actions?

Skin texture Photoshop actions are a set of automated scripts or presets that can be applied to a photograph or image in Adobe Photoshop to enhance or modify the texture and appearance of a person's skin. These actions are often used in portrait and beauty retouching to achieve a smoother and more flawless skin complexion while maintaining a natural look.

When using skin texture Photoshop actions, it's essential to exercise restraint and maintain a balance between retouching and retaining a natural look. Overdoing skin retouching can result in an unnatural, plastic appearance.
