ProColor preset Lightroom By ProPreset (LRTEMPLATE)

2025-02-10 16:59:27　　label 我要反馈　　下载页面

The final product to be used in photography. Incredibly the sensible and brightly colored arrangement highlights maintaining their innocence and juiciness.

Excellent pictures where you wish to enhance the beauty of these colors. Make this the attention that would draw in audiences.

To use a preset, double-click it using the mouse, and also the Default Lightroom installs it from the user's library.

Before use, be certain that you properly display white balance. To reduce the impact of this filter is essential to adjust the sliders from the foundation section. Following the program is suggested to correct the contrast.
