HitPaw Photo Object Remover v1.2.5 for macOS

2026-05-20 14:05:18

HitPaw Photo Object Remover is a simple and straightforward photo editing program that utilizes AI to delete any unwanted objects from photos. People, objects, clutter, shadows, text, watermarks, and other distractions can be erased without having to use advanced editing techniques. It has been created to be fast, simple, and appropriate for novices to use while cleaning photos.

The program can also edit and change the background of photos. It automatically identifies the background and removes it and isolates the main subject, generating clean edges that give a polished look to the final image. It's easy to change the background to a different color, which can be helpful for profile pictures, product photos, social media photos, and marketing graphics.

HitPaw Photo Object Remover is also beneficial for portrait retouching and for enhancing old photographs. Is capable of eliminating blemishes, wrinkles, acne, freckles, scratches, creases, and stains while maintaining the natural texture of the photo. The AI-powered inpainting feature seamlessly fills in removed areas and enhances old or damaged photos.
