This course is your entry point into the exciting world of Blender, an open-source, well-known software that has helped a multitude of creators around the world.

Explore Blender's possibilities while immersed in its interface, and master the essential methods in modeling, material lighting, and animation. Through a hands-on approach, you'll design a breathtaking scene from scratch, including an impressive animated robot.

Don't hesitate! Join now and begin your journey to becoming a proficient 3D artist. It's time to start pursuing your artistic ambitions using Blender!

Lessons in This Class:

- Introduction
- Introduction to the Interface
- Navigating the 3D Environment
- Selecting and Transforming Objects
- Creating and Deleting Objects
- Modeling Part 1 - Selection
- Modeling Part 2 - Creating and Deleting Components
- Modeling Part 3 - Modeling Tools
- Copying Objects
- Applying the Scale
- Modeling Exercise
- Subdivision Surface
- Smoothing
- Robot 1 - Modeling the Head Part 1
- Robot 2 - Modeling the Head Part 2
- Robot 3 - Modeling the Body
- Robot 4 - Modeling the Arms
- EN Robot 5 - Modeling the Hands
- Robot 6 - Modeling the Fingers
