Master After Effects – Tips & Tricks: I'll share many tricks and tips inside Adobe After Effects in this course. This course differs from other courses, as there will not be any particular procedure or structure to follow, but just techniques and suggestions.

It can be viewed as your "Weekly Tips & Tricks" and view it every week (or every day if you like (or daily if you prefer)).

It will focus on learning new methods, features, and different keyboard shortcuts (I am a fan of keyboard shortcuts, as you will see in the videos)) and various methods of getting a particular outcome.

This course is meant for those comfortable using After Effects, as I will not teach the fundamentals. It is essential to have a good knowledge of Adobe After Effects.

Be sure to have a solid background and knowledge of After Effects and how to use it, make animations, and learn the basic concepts of working in Adobe After Effects.

So, the topics I'll be discussing here will include things like:

- Keyboard shortcuts
- Some tips
- Many useful tips
- Many methods for achieving the desired result
- Hidden features inside After Effects
