PRTG Network Monitor v17.3.33.2753 + Manual

2026-08-25 14:55:17

Monitor all of the programs, traffic, devices, and software on your IT infrastructure.

Everything is contained with PRTG; there's not any demand for extra downloads or plugins.

PRTG is a strong and easy-to-use alternative, which is acceptable for companies of all sizes.

Bandwidth: Ascertain how much bandwidth that your devices and software are utilizing and establish the source of bottlenecks.

Database: Monitor particular datasets out of the databases using individually-configured PRTG detectors and SQL queries.

Program: Handle all of your programs and get detailed statistics about each program running on your system.

Cloud: Centrally track and handle all of your cloud computing solutions from anywhere.

Server: Monitor all kinds of servers in real-time concerning accessibility, availability, ability, and general reliability.

LAN: Keep tabs on your entire community networks, such as your workstations, routers, switches, servers, and printers.

SNMP: Monitor a diverse Assortment of devices with the SNMP performance of PRTG.

Maps and dashboards: Picture your system utilizing real-time avenues with live status information.

Create dashboards using the PRTG map programmer, and incorporate all of your network components using over 300 different map items like apparatus and status icons, traffic graphs, top lists, and much more.

Individualize your map with custom HTML. As soon as you're done, talk about your map for a URL that's available either openly or just internally in your LAN.

Flexible alerting

PRTG alarms you when it finds problems or odd metrics

PRTG includes many built-in mechanics such as notifications, for example, email, drive, or HTTP requests. Together with our free programs for both Android and iOS, you can get push notifications sent straight to your cell phone.

Adapt the notification system to fit your requirements and schedule alarms (like no low priority alarms at night'), or prevent alarm floods using dependencies.

You may also use our PRTG API to write your own alarms.

Integrated technology: PRTG monitors your entire IT infrastructure.

All Vital technologies are encouraged :

• SNMP: ready-to-use and custom Choices

• WMI and Windows Performance Counters

• SSH: for Linux/Unix and macOS systems

• Traffic analysis using flow protocols or packet sniffing

所有软件资源 100%安全 已检测 无病毒 无篡改
