ChatGPTWizard v2.2.0.9 (21 Nov 2023) for Delphi Full Source

2024-12-28 23:01:56

Introducing **ChatGPTWizard**, the first-ever plugin for Embarcadero RAD Studio IDE 10.1 and later versions that seamlessly integrate ChatGPT, Writesonic, and YouChat services directly into your development workflow. With **ChatGPTWizard**, you can enhance your coding experience with advanced AI-powered features and streamline your development process.

Key features of include a free-text question form and a dockable question form, allowing you to interact with the AI services while coding easily. You can ask questions inline in the editor or access context menu options for tasks like bug finding, test writing, code optimization, and adding comments. The plugin also offers a class view with options for code conversion, optimization, test units, and more, along with predefined questions for quick access.

With a history feature to save your tokens for OpenAI, fuzzy string match searches, and animated letters for visual appeal, **ChatGPTWizard** enhances your coding environment. It also includes an AI code translator, proxy server options, and support for Writesonic AI and YouChat AI as additional AI services, providing comprehensive tools to boost your productivity and creativity while coding.

Key Features of **ChatGPTWizard** :

1. Free-text question form for seamless interaction with ChatGPT, Writesonic, and YouChat services
2. Dockable question form for convenient access while coding
3. Inline questions in the editor for quick queries
4. Context menu options for tasks like bug finding, test writing, and code optimization

所有软件资源 100%安全 已检测 无病毒 无篡改
