Strings and Regular Expressions in JavaScript - Andrejs Doronins

2025-04-01 19:44:24

This course, delves into the essential aspects of working with text in programming, particularly focusing on JavaScript's String and Regex API. With many methods available for string manipulation, this course equips you with the knowledge to write clean and efficient code for various tasks.

Beginning with an exploration of different string definition methods, including template literals and string interpolation, you'll proceed to master the String API. Through practical exercises and the creation of a utility library, you'll learn how to utilize String API methods to accomplish diverse tasks effectively.

Moreover, **Strings and Regular Expressions in JavaScript - Andrejs Doronins** delves into the strategic application of Regular Expressions, offering insights into their usage and importance in text processing. By the course's conclusion, you'll have acquired the skills and expertise necessary to handle strings and regex proficiently, empowering you to tackle text-processing challenges confidently.

Strings and Regular Expressions in JavaScript Table of contents:

1. Course Overview (Duration: 1 minute)
2. Diving into String Definition (Duration: 37 minutes)
3. Achieving Tasks With the String API (Duration: 45 minutes)
4. Understanding and Applying Regex (Duration: 28 minutes)
