ESBPCS for VCL v6.15.1 (05 Jan 2024) for Delphi 7-12 Athens Retail Full Source

2026-04-29 10:06:46

(ESB Professional Computation Suite) is a comprehensive toolkit designed to streamline data entry and manipulation for developers and users across many Embarcadero environments. With an expansive collection of over 6000 routines/methods and more than 235 classes/components spread across 140 units, it supports Delphi and C++ Builder editions from various versions. Its versatility includes Integer Edits, Float Edits, Date Edits, Comboboxes, Calculators, Statistical Analysis tools, and more, catering to a wide range of data management needs.

This suite offers an extensive array of components for effortless data handling and data-aware versions for seamless integration with database applications. From basic input controls like SpinEdits and Memos to advanced functionalities such as Statistical Analysis tools and Financial calculations, **ESBPCS for VCL** provides developers with a robust toolkit to enhance their applications' efficiency and usability.

In addition to its rich component library, **ESBPCS for VCL** boasts a comprehensive set of routines that cover various

domains, including Mathematics, Probability, Physics, File IO, and more. Whether it's performing complex calculations, managing file operations, or handling date and time functionalities, this suite equips developers with the necessary tools to meet their computational requirements effectively and efficiently.

Key Features of **ESBPCS for VCL** :

1. Over 6000 routines/methods and 235+ classes/components
2. Compatibility with Embarcadero environments, including Delphi and C++ Builder
3. Integer, Float, Date, Time, and Percentage Edits
4. Hex, IP Address, Complex, Fraction, Currency, and Calculator Edits
5. Calendar, Comboboxes, SpinEdits, Checkboxes, RadioGroups
6. Data-aware versions for seamless integration with databases
7. Statistical Analysis tools, Labels, Memos, RichEdits
8. Mathematics, Probability, Statistics, Complex Numbers
9. Physics, Geometry, Astronomy, Unit Conversions
10. File IO, Registry, Financials, Country Lists
11. Holidays, Time Zones, Dates, and Times functionality
