Aescripts Explode Shape Layers v3.5.4b: Take charge of your silhouette layers! Explode & merge For increased precision.

Can you deal with a lot of form layers or contour Layers from Adobe Illustrator? Explode will require a contour layer and divide out each shape into its individual coating, for easier management & simpler accessibility. As an alternative, you can Combine multiple silhouette layers into a new coating!

Gfx plugin details of Aescripts Explode Shape Layers v3.5.4b

The product is in the **After Effects Plugins** category from **AeScripts**, for more information about this post you can click on the home page link in the sidebar.

To search for similar products to Aescripts Explode Shape Layers v3.5.2 Full + Tutorials, **Does this product work on Windowns and Mac Os?** We mostly include the operating system in the title. if it is not written, it will work on Windows, and you can for the Mac version.

Tired of needing to manually right-click your .ai coating to create a contour layer? Utilize Convert!

If one of your Illustrator layers possesses non-100 percent Opacity or moves out of the framework, you have probably discovered that switching brings in a vacant artboard artifact that gets at all. No longer! Eliminate it with Eliminate Artboard.

Today, your new contour layers likely have a slew of Strokes and fills that need adjusting– that is what Select Fills and Select Strokes are all for. One-click switches to Pick all documents or all strokes on your Comp, or maintain change to come across any strokes or knobs using exactly the identical color as the Chosen.

- Intro & Interface
- Explode
