SOUND EFFECTS

Function Loops Astronaut Sci-fi FX WAV: After an extended time working on it, it's finally available: a brand new and unique FX collection that will transport you to another world!

There are many ways to make this distinctive sample pack that include foley from nature and in the studio (capturing strange sounds), modulation automation, and a mix of hardware and software synths plugins, which are all connected to make crazy chains for the sound effects. These are all original and never utilized!

This will significantly improve your music and provide an individual character. It can give a unique personality to Psytrance, Techno, Dubstep, Drum&Bass, Electronica, Downtempo, Cinematic, Trip Hop, and many other genres that are looking for something distinctive.

Are you willing to go on the next adventure? You'll experience something new that you've never before experienced.

PACK CONTENTS + BONUS

- 100 fx one-shots
- 50 dry FX samples
- 50 wet fx samples
- 5 construction kits (key and BPM for identification)
- 114 loops (strings, brass, drums, pianos, strings, percs, etc.)
- 80 MIDI files
