Ginno Legaspi review - SoundBytes Magazine :

In this issue, too, is a 1.3 1 GB cinematic library by Bluezone which focuses on powerful sound effects. Cinematic Tension Sound Effects caters to those who are seeking useful examples for the production of soundtracks, musical backdrops as well as game music, and film music. The material in this library is like the dark style that is found in Scary Ambiences and Sound Effects (reviewed above) but it is focused on sequences, not desolated and dark textures. There are a variety of effects synth sequences, as well as many different textures to help take your work to the highest level.

Its sound quality is incredibly excellent and the pack is rich enough to keep producers going when they are trying to get started on their own sci-fi, dark-movie, and terrifying video game compositions. That said I'm confident that this sample pack will make its way into the hands of many contemporary music producers and composers. My personal favorite is "ambiences" folder as there are many gems in it.

INCLUDES

- BC0212 WAV\ambiences\Bluezone-BC0212-ambience-001.wav
- BC0212 WAV\ambiences\Bluezone-BC0212-ambience-002.wav
