AEJuice Liquid Elements for AE and PR: If Disney owns five licenses for your product, you've found the right place.

Liquid Elements is a flagship product from AEJuice, which is used by some of the biggest companies in the world, as well as over 100k individual video editors. Creating the world's most comprehensive frame-by-frame animation library took years of dedication, which is growing each year.

Music videos, commercials tutorials, explainer videos, fan videos, social media events, ads, and many other applications have made Liquid Elements a universal tool for all your videos.

How to use liquid effects and speed lines to design your animation?

You can use "AEJuice Liquid Elements for After Effects and Premiere Pro" for design.

Where can I download the product?

After subscription, You can download it for free from here.

Each animation was made by hand, at 12 fps, with an end-of-use case in mind. These categories contain splashes, explosions and claws, water drops, lightning, tears, smoke fire, doodles stars, speed lines, waves, noise, and skulls, to mention some (see previews for the complete list), and consist of 1200plus animations.

We've created a unique Liquid Elements engine to customize styles. Each animation has different styles, including glow or doodle, textured, and others. The liquid effect is simple to apply to any color scheme and can be used to complement any design you make.

Let's say you've got an idea with a doodle design. With a single click, you can change the animations of over 1200 in this doodle style. If you choose a different hue, you can alter the 1200plus colors.

Changed projects that require a different style? It's not a problem! Change your style in just one click. Style engines provide more than 10,000 different styles and an unlimited collection of styles to choose from. If you're skilled After Effects user, you can make your designs and control everything using code. This is possible when you use Liquid Animation After Effects or Liquid Elements After Effects.

What is AEJuice Liquid Elements for After Effects and Premiere Pro?

AEJuice Liquid Elements is a collection of animated liquid motion elements designed for use in Adobe After Effects and Premiere Pro. These elements include various liquid effects such as splashes, drops, blobs, and transitions that can be easily customized and incorporated into motion graphics, animations, titles, and video projects.

The Liquid Elements pack offers a wide range of pre-designed liquid animations that can be easily adjusted to fit your project's style and aesthetic. These elements are typically used to add dynamic and visually appealing effects to videos, commercials, presentations, and more.
