Presets Overview:

COLOR: Our go-to color preset draws inspiration from the earthy tones of Scotland and our love for the cinematic look. Crafted with a natural, filmic tone curve and balanced hue/saturation levels, it delivers a cinematic look suitable for all lighting situations, primarily focusing on natural skin tones.

MONOCHROME: A timeless black-and-white look that complements any lighting situation. The tone curve creates deep shadows (without crushing them) and slightly softened highlights, resulting in a soulful black-and-white look with impact.

Modifiers: A set of unique color grading looks, from cool to warm to natural, can be applied using the included modifier tools.

Editing Tutorial: Unlock the full potential of the presets with over an hour of tutorial videos that guide you through The Kitcheners' editing process from start to finish. Gain insights into the thought process behind creating and editing images to achieve a cinematic look.
