In this extensive course, you'll discover all you must learn about animators of text using After Effects, and you'll create complex text animations within minutes.

In each short video, we discuss a range of subjects:

- The basics of animators for text
- All controls for animating text and options
- Wiggle, Range expression selection choices
- Customizing text animation presets to save text
- Plus, many more.

At the end of the course, you'll have all the tools you require to accelerate your animation workflow using this potent animation tool. As the class progresses, you'll discover how I approach specific animation examples and the best way to tackle a single animated project from several perspectives. Other course participants and I are available for feedback, answering questions, and sharing ideas.

Animating text - In this tutorial for animation, Jake shows you how to utilize Adobe After Effects to bring your text to life. Jake shares his unique process and explains his keyboard shortcuts and other tricks to help you make your animation easy, efficient, and enjoyable while learning. This animation course is designed for those who want to learn more about this art and enhance their abilities.

Make your animations - You'll be asked to design a custom text animator and save it to a preset. Then, you can post your animated text within your course project and share as many examples as possible. By sharing numerous examples of your project, there are many chances to get valuable feedback and boost your confidence!

Breaking down the Text Animator - Jake takes you through the entire Text animator settings and features. He then shows you how to make unique text animations with the controls. It will start slowly, and then you'll add complexity as you progress through the instructional content—saving an existing preset. Under Jake's direction, you'll be taught how to create your

custom text animator presets to accelerate the process of creating text animation.
