AI Animation: Animating Midjourney images: Midjourney is among the most potent AI Art Generation programs. However, it has a limitation – the inability to animate the incredible images it produces. Enter this course!

By leveraging additional tools and techniques within the Adobe Suite, we'll unlock the ability to animate the stunning AI images generated by Midjourney, adding a subtle yet realistic camera move. If you don't have access to Midjourney, no worries! I'll provide my image for you, or you can use one of the many free AI image generators showcased in the second video of this course. You'll need Photoshop and After Effects, both of which offer free trials to follow along.

Prerequisites:

- Internet connection
- Email address
- Photoshop and After Effects (free trials available)

Course Outline:

01 - Accessing Course Software and Materials:

- Quick overview of the software used
- Introduction to AI image generators (free and subscription-based)

02 - Generating Our Image in Midjourney:

- Walkthrough of creating an image (applicable to other AI art generators)

03 - Preparing the Image in Photoshop:

- Essential steps to ready the AI image for animation

04 - Animating in After Effects:

- Guided process for executing the final animation of our AI image

Class Project (Assignment):

- Detailed walkthrough of the class project
- Summary of skills and techniques learned in the course

As highlighted in the course outline, the journey concludes with a dynamic assignment, allowing you to apply the skills acquired. I'm excited to see your creations, so please share your work and any notable insights! You can submit your work via a YouTube link to showcase your crafted animations.
