TMS FlexCel Studio for .NET v7.26.0 (04 Apr 2026) ALL PLATFORMS + Nuget Packages Retail

2026-04-09 21:59:30

TMS FlexCel Studio for .NET offers a comprehensive suite of managed code components for Excel file manipulation and report generation within .NET environments, including Windows Store applications. With its native .NET components, developers can effortlessly create, modify, and read Excel files (.XLS and . XLSX) without additional OLE/dll dependencies or Excel installation. This versatile tool supports a wide range of Excel file formats from Excel 2 to 2023 and runs seamlessly on various .NET frameworks, including .NET 3.5, 4.0, 4.5, 4.6, 4.7, 5, 6, 7, .NET Core, Windows Universal Apps, and Mono.

Featuring an exceptionally fast and reliable engine, enables high-speed generation of thousands of files per minute while preserving nearly all elements from the original file, including macros and ActiveX objects. With support for over 300 Excel functions, encrypted file handling, and native PDF export capabilities, developers can efficiently create complex reports, leveraging Excel as the design interface. The extensive API facilitates programmatically writing and reading files, including formatting information, images, comments, and more. **TMS FlexCel Studio for .NET** offers full documentation, including guides, tips, references, and numerous examples, ensuring users a smooth and productive development experience.

Key Features of **TMS FlexCel Studio for .NET**:

1. Native .NET components for Excel file manipulation; no additional dependencies required
2. Supports Excel file formats from Excel 2 to 2023
3. Compatible with .NET 3.5, 4.0, 4.5, 4.6, 4.7, 5, 6, 7, .NET Core, Windows Universal Apps, Windows Store 8.1, and Mono
4. Exceptionally fast engine capable of generating thousands of files per minute
5. Ability to modify. XLS and . XLSX files while retaining existing elements like macros and ActiveX objects
6. Supports over 300 Excel functions for formula recalculation
7. Handles encrypted. XLS and . XLSX files, including Office 2007, 2010, and 2013 encryption
8. Written in 100% managed C# code, no interop or p/invokes
