

Embarcadero RAD Studio XE8 Architect Update 1 v22.0.19908.869

2024-12-18 23:03:45 [label](#) [我要反馈](#) [下载页面](#)

The Embarcadero RAD Studio XE8 has been delivering easy connectivity and platforms for mobile phones that support the connected apps that are for the Windows, Android, OS X, and the gadgets of the IoT devices. This has featured new iOS 64-bit and the support of the Universal App, RAD Studio XE8 allows and enables the development of the teams to easily add the IoT to the features just like the proximity with the beacons awareness. The improved app performance as well as the developer's productivity along with the better and clearer understanding of the app for the user behavior. Embarcadero is entirely a software development app for the fast solution and building of the native windows software, OS X, iOS, and of course Android. It helps in modernizing the procedures along with the programs for wearable gadgets and it has a very high performance that can be compiled with cloud devices, solutions, and gadgets and detectors. It helps the user to create fast native programs that are mainly for Windows and OS X along with the codebase which is from cellular 1. Source codes are now easily discovered with the help of the new GetIt Package of the manager as well as the components that are mainly from the IDE. The customers are developing and also maintaining business-critical Windows applications which accounts for almost millions of them. Today all they are doing is to drive to extend those applications with the use of mobile extensions, cloud services, and the IoT that enhances the experience of the user. The RAD Studio XE8 delivers the team's features to expand as well as enhance the experience of the customers. The IoT is a particular customer experience that is possible to revolutionize and yet still it has been out of the reach of many of the users as well as the developers. With the XE8, Embarcadero is right at the forefront of allowing and enabling the users as well as the developers to integrate the Internet of Things in the year 2015 and maybe beyond. There are many other new enhancements in the XE8 version of the Embarcadero RAD Studio which included the major development boosters from the Castalia integrated plug-in with the refactoring of the Object Pascal. RAD Studio XE8 has been launched by Embarcadero Tech. It has the ability to extend the mobile app, cloud, and the Internet of Things.

Embarcadero RAD Studio XE8 Amazing Attributes:

- iOS 64-bit and Universal App Support:** To deliver the app to the Apple App Store, the version RAD Studio XE8 has featured a new iOS 64bit which is an Object Pascal C++ compiler. These include the links and the tools for the purpose of building the target iOS 64 bit. Apple Universal app is being supported by the RAD Studio XE8 and luckily it offers a wide range of binaries in a single package.
- Proximity Awareness with Beacons:** The new components of the beacon which are supported in the RAD make it very easy for the user to add the proximity along with the location of the awareness to the current existing Windows and the apps in the mobiles.
- App Analytics:** To understand the behavior of the user, App Analytics has the role to capture anonymous usages and its statistics on the behavior of the user applications that are built with the RAD Studio XE8. The App Analytics is a service which is a pay per use which offers the VCL and the Fire Monkey supports to that of the existing applications of the Windows and the OS X, Android and the iOS apps as well.
- GetIt Package Manager:** Hosting the VCL as well as the multi-device libraries along with their components, GetIt manager provides a very easy discovery, download as well as the update of the code of the libraries and their sources, components and the features from the Embarcadero GetIt servers. It is very easy, just with a click it will be installed. It also includes the project of the Turbo Pack.
- Upgraded Enterprise Mobility Services (EMS):** EMS is basically a turnkey that is on the premise solution for mobilization being distributed, and being connected is equipped with the push notifications for the support for the iOS as well as Android.
