Arclab Web Form Builder Pro v5.5.11

2025-05-23 13:10:34

Arclab Web Form Builder Pro is a robust form development software designed for beginners and professionals, offering a visual HTML/PHP form editor for Windows PC. Using a visual environment, this powerful tool allows users to design various forms, from simple contact forms to complex multi-page forms. The software includes ready-to-use form templates, design templates, and form modules, making creating single- and multi-page web forms easy.

Key features of include the ability to integrate web forms into almost any website, insert forms into existing HTML or PHP pages, and seamlessly integrate forms into CMS systems like WordPress, Joomla, Drupal, or Typo3 without additional plugins. The software eliminates the need for form coding or extensive PHP knowledge, making form creation accessible to all users. It supports multiple functionalities such as sending form submissions via PHP mail() or SMTP, inserting submissions into MySQL databases, processing payments directly in forms, and more.

One notable feature is its private and secure operation—no external data processing is involved. The generated PHP script runs on users' websites, providing complete control over data. **Arclab Web Form Builder Pro** ensures GDPR compliance for European Union users. Users can enjoy unlimited form submissions with a one-time payment model and no recurring fees. The software is designed for Windows PC, offering a visual web form editor that works with all modern browsers and does not require external resources like jQuery. With a focus on flexibility and customization, this software empowers users to design professional online forms without coding expertise.
