Devart dotConnect for Salesforce Marketing Cloud Professional v3.0.0 (18 Dec 2025)

2026-01-12 11:53:04

simplifies the integration of Salesforce Marketing Cloud data with .NET applications. With its ADO.NET classes and Visual Studio integration, developers can effortlessly bind data to their projects, reducing coding efforts. The connector offers robust SQL capabilities, enabling CRUD operations directly on Salesforce Marketing Cloud objects without complex API knowledge.

Furthermore, **Devart dotConnect for Salesforce Marketing Cloud Professional** provides extensive support for Entity Framework, facilitating seamless data access through various versions. Developers can utilize features like LINQ to Entities and entity relations, enhancing productivity. Bundled visual designers like Entity Developer streamline ORM model creation, optimizing development workflows in Visual Studio.

Key Features of **Devart dotConnect for Salesforce Marketing Cloud Professional** :

1. Seamless integration of Salesforce Marketing Cloud data with .NET applications
2. ADO.NET classes and Visual Studio integration for effortless data binding
3. Robust SQL capabilities for executing CRUD operations directly on Salesforce Marketing Cloud objects
4. Extensive support for Entity Framework, including LINQ to Entities and entity relations
5. Simplified ORM model creation with bundled visual designers like Entity Developer
6. Optimized development workflows in Visual Studio
