INSTRUCTIONS

Three ways to apply photo overlays

1ST WAY: OVERLAYS IN THE ACTION

This allows you to quickly apply overlays from any folder or other sellers. To make this action 1, you can simply change the hotkey F3 from the settings. Double-click overlay actions .atn to load it into Photoshop. Once installation is complete click the "Window > Activities" button to access Photoshop's Actions panel. You have two options: JPEG Overlays or PNG. Overlay Action JPEG differs from Overlay Action PNG because JPEG uses Screen Blend Mode. 2. To play the action that you desire, click on "Overlays Action". 3. The Photoshop dialog box appears. The dialog box prompts you to select the file. Click 'Continue to select the file that you want to open. The image will be instantly added to your Photoshop file. 4. You can adjust, rotate, and reflect the overlay if you want. You can create layers and adjust layers by pressing Cmd(Ctrl), + Enter. To conceal the image, use a black brush on the layer mask. Adjust the color or Levels of the correction layers so that the overlay matches the photo. 6. Your customers will be thrilled to see the image.

2ND WAY: Quickstart PSD Course

This allows you to work with photoshop files. You can select the overlay you wish, and the layer will be visible. This is convenient because you can see thumbnails of the layers within your image. It is not possible to open the file in Photoshop. This function isn't necessary and is provided as-is.

DRAGG'N DROP: 3RD WAY

1. Drag an image from the folder to a Photoshop file. Screen Blend Mode can be used to blend images with black backgrounds. To change the blend mode, double-click on the layer. The layer styles window will now open. Next, adjust the blending mode. For overlays with transparent backgrounds, you don't have to make any changes. You can scale, transform, lower, or increase the transparency of your overlay and then paint over it.
