DayPilot Pro for ASP.NET WebForms v2020.4.3775 (01 Nov 2020)

2024-12-28 23:45:36

Library of ASP.NET scheduling user-interface controls which use the conventional ASP.NET WebForms web management version. Works with. NET Framework 2 and greater.

All of the ASP.NET tutorials comprise **origin code** in both C# and VB.NET as well as the trial edition of DayPilot Pro.

ASP.NET Event Calendar: DayPilot ASP.NET Event Calendar shows an Outlook-like day/week view. Columns are customizable (you may display a custom amount of times or tools). Supports drag and drop AJAX surgeries (event producing, moving, resizing), context menu, incorporated message pub.

DayPilot Calendar is an ASP.NET control that shows events within an Outlook-like day/week perspective (with customizable columns).

ASP.NET Monthly Calendar: DayPilot ASP.NET Monthly Event Calendar is an Outlook-like month opinion. Events can span multiple days or be piled inside cells. Supports drag&drop AJAX operations (moving, resizing), context menu.

DayPilot Month is a controller for demonstrating an Outlook-like month perspective.

ASP.NET Scheduler: DayPilot ASP.NET Scheduler is a deadline perspective of numerous sources. The cell size is flexible (1 min - 1 week). Supports drag&drop AJAX operations (moving, resizing), the hierarchy of tools (treeview), lively occasion loading (while scrolling), and other innovative capabilities.

DayPilot **ASP.NET scheduler management** shows a deadline for numerous sources.

ASP.NET Gantt Chart: DayPilot ASP.NET Gantt Chart shows a deadline to get a hierarchy of tasks, 1 job per row. The Gantt chart supports job groups, landmarks, job dependencies, drag and drop operations, job and row customizations, and much more.

DayPilot Pro comprises an **ASP.NET Gantt Chart** controller. It exhibits a timeline to get a hierarchy of activities.
