What is a Sound Design Collection?

A "Sound Design Collection" typically refers to a curated set or library of audio elements, effects, samples, or presets created for use in various media production projects. Sound design is the process of creating or selecting sounds to enhance the auditory aspects of a film, video, game, or other multimedia content. A sound design collection provides a comprehensive and organized assortment of pre-recorded or designed sounds that can be used by audio professionals, musicians, filmmakers, and other creatives.
